1. The testing shall be conducted in accordance with the standard test method for measuring the ignition strength of cigarettes established by the American Society for Testing and Materials International standard E2187–04. The department may adopt a

substitute test method that is different from the standard test method, if the department finds that the substitute test method does not result in a change in the percentage of full-length burns exhibited by any tested cigarette when compared to the percentage of full-length burns the same cigarette would exhibit when tested in accordance with the standard test method.

2. The testing shall be conducted on 10 layers of filter paper.

3. The fire safety performance standard under this subsection shall be applied only to a complete test trial, which shall consist of 40 replicate tests for each cigarette tested.

(c) *Fire safety performance standard.* 1. A testing of cigarettes does not meet the applicable fire safety performance standard unless no more than 25 percent of the cigarettes tested in a complete test trial under par. (a) exhibit full-length burns.

b. For a cigarette that has bands positioned by design, the cigarette shall have at least 2 nominally identical bands on the paper surrounding the tobacco column. At least one of these bands shall fully be located at least 15 millimeters from the lighting end of the tobacco column, and at least one of the remaining bands shall fully be located at least 10 millimeters from the filter end of the tobacco column or at least 10 millimeters from the labeled end of the tobacco column for a nonfiltered cigarette.

If the department determines that a type of cigarette cannot be tested in accordance with the test method required under par. (a), the manufacturer thereof shall propose an alternative test method and alternative fire safety performance standard for approval by the department.

(c), the department shall approve the alternative test method and the alternative performance standard for use by the manufacturer.

(e) *Provisions from other states.* In lieu of approving an alternative test method and alternative fire safety performance standard under par. (d), the department may review the cigarette fire safety requirements enacted or otherwise adopted by another state. The department shall allow a manufacturer to use the results of the other state’s alternative test method and alternative performance standard for the purpose of certification under sub. (2) (a), if the department determines that the safety requirements are com-

parable to the requirements under this section, that the other state's safety requirements specify the same test method and the same performance standard that are specified in pars. (a) and (c), and that the other state has approved an alternative test method and alternative performance standard as meeting the requirements under that state's cigarette fire safety requirements. The department may not require additional testing under this paragraph, unless the department determines that it is not reasonable for the results to be used for this purpose.

(em) *Additional testing.* This subsection does not require additional testing if the cigarettes have been tested for another purpose with methods that are in accordance with the testing methods recognized under this subsection.

(f) *Reporting requirement.* 1. Each manufacturer shall keep reports on all test results on all types of cigarettes that are offered for sale and that are conducted to determine compliance with this section and shall keep copies of these reports for 3 years.

4. The letters "FSC."

(c) A manufacturer shall use only one marking, shall use this marking uniformly for all types of cigarettes marketed by the manufacturer, and shall apply this marking to all packs, cartons, cases, and other packages containing the cigarettes.

(d) Prior to the certification of a type of cigarette, a manufacturer shall present its proposed marking to the department for approval. Upon receipt of the proposed marking, the department shall approve or disapprove the marking presented subject to par. (e). If the department fails to act within 10 business days after receiving the proposed marking, the marking shall be considered to have been approved by the department.

(e) The department shall approve a proposed marking under par. (d), if the proposed marking meets the size and location requirements under par. (a) and if either of the following applies:

1. The marking is in use and has been approved for cigarettes that are sold in New York.

(c) Paragraph (a) does not apply to the selling or the offering for sale of cigarettes solely for the purpose of consumer testing that is conducted by a manufacturer or under the control and direction of a manufacturer if all of the following apply:
